

Smart Assessment and Guided Education with Responsible AI (SAGE-RAI)

Can responsible Generative AI (GenAI) lead to improved student outcomes?

- Personalised learning is known to be very effective (Bloom, 1984)
- One-to-one tutoring is expensive to scale

Generative AI opens new possibilities, and risks

SAGE-RAI is investigating how an AI Digital Assistant can improve student outcomes, and what the ethical and pedagogical issues are in Generative AI for personalised tutoring.
